

Accommodation in Japan.

- **Option 1 - SIT dormitory**

As for our dormitory, the problem is that we don't have any vacancies so far because it's very popular.

We are not sure whether there will be any vacancies for next semester as well but once it opens, we will notify it to all the incoming international students.

The monthly rent is JPY 35,000.

- **Option 2 - finding accommodations**

We introduce private accommodations for incoming students such as below.

Plus, we have a partner accommodation agency and they will contact students directly to provide reasonable accommodation information and support them until completing making contracts.
