FACULTY OF CHEMISTRY

SUBJECT CARD

Name of subject in English: Diffusion Processes
Main field of study (if applicable): Chemical and Process Engineering
Specialization (if applicable):
Profile: academic
Level and form of studies: 1nd level, full-time
Kind of subject: obligatory
Subject code: ICC015010
Group of courses: NO

	Lecture	Classes	Laboratory	Project	Seminar
Number of hours of organized classes in University (ZZU)			45	30	
Number of hours of total student workload (CNPS)			90	60	
Form of crediting			crediting with grade	crediting with grade	
For group of courses mark (X) final course					
Number of ECTS points			3	2	
including number of ECTS points for practical (P) classes			3	2	
including number of ECTS points for direct teacher-student contact (BK) classes			1,5	1	

PREREQUISITES RELATING TO KNOWLEDGE, SKILLS AND OTHER COMPETENCES

1. Know of physical chemistry and processes thermodynamic.
2. Know of foundations of chemical engineering.

SUBJECT OBJECTIVES

C1. Introduce of theory of mass transfer between two phases.
C2. Classification methods of mass transfer apparatus.
C3. Know mathematical description of mass transfer rate in diffusional processes.
C4. Introduce of calculation methods of selected apparatus used for diffusional separation of components.
C5. Learn carrying out simple calculations of kinetic parameters of mass transfer processes.
C6. Learn to work out project procedures of selected mass transfer apparatus.
C7. Introduce of selected measurements methods of characteristic parameters of mass transfer processes in different apparatus.

SUBJECT LEARNING OUTCOMES

related to skills:

PEK_U01 – can match mass transfer apparatus for realization of different mass transfer processes.
PEK_U02 – can carry out balance and kinetic calculations different kinds of mass transfer apparatus.
PEK_U03 – can make experimental measurements of characteristic parameters of mass transfer in laboratory scale apparatus.

ROGRAMME CONTENT

	Laboratory	Number of hours
Lab1	Organizational activities. Becoming acquainted with rules of health and safety at	3

	work in research laboratory. Presentation of basic apparatus used in experiments.	
Lab2	Extraction efficiency in the liquid - liquid system.	3
Lab3	Volume overall mass transfer coefficient and high of mass transfer unit.	3
Lab4	Influence of mixing energy on mass transfer coefficient in the solid – liquid system.	3
Lab5	Influence of mixing energy on mass transfer in RDC column.	3
Lab6	Efficiency of sieve plate in the desorption process of gas.	3
Lab7	Extraction efficiency in the liquid - liquid system II.	3
Lab8	Partial colloquium I.	3
Lab9	Influence of liquid pulsation on mass transfer rate.	3
Lab10	Volume overall mass transfer coefficient and high of mass transfer unit.II.	3
Lab11	Mass transfer from solid surface in conditions of natural convection.	3
Lab12	Determination of mass transfer coefficient from solid surface in conditions forced convection.	3
Lab13	Measurement of axial mixing with the use of impulse method.	3
Lab14	Supplementary laboratory, partial colloquium II.	3
Lab15	Repeat colloquium and credit.	3
	Total hours	**45**
Project		**Number of hours**
Proj 1	Calculation methods of overall mass transfer coefficients in the gas – liquid systems. Project of absorber. Partial colloquium I.	10
Proj 2	Balance calculations of simple distillations and rectifications in two component system. Project of rectification column. Partial colloquium II.	10
Proj 3	Methods of realization and calculation of liquid – liquid extraction processes. Project of extractor. Partial colloquium III.	10
	Total hours	**30**

TEACHING TOOLS USED

N1. Lecture with multimedia presentation.
N2. Solving of problems.
N3. Implementation of calculations and design with using own procedures worked out in Excel.
N4. Presentation of projects.
N5. Experiments performing and preparing of report.

EVALUATION OF SUBJECT LEARNING OUTCOMES ACHIEVEMENT

Evaluation (F – forming (during semester), P – concluding (at semester end)	Learning outcomes number	Way of evaluating learning outcomes achievement
F1(project)	PEK_U01, PEK_U02	Partial colloquium I
F2(project)	PEK_U01, PEK_U02	Project report I
F3(project)	PEK_U01 PEK_U02	Partial colloquium II,
F4(project)	PEK_U01 PEK_U02	Project report II
F5(project)	PEK_U01 PEK_U02	Partial colloquium III,
F6(project)	PEK_U01 PEK_U02	Project report III
C(project) = (F1+0,8F2+F3+0,8F4+F5+0,8F6)/6		
F1 (laboratory)	PEK_U03	Partial colloquium I
F2 (laboratory)	PEK_U03	Partial colloquium II

F3 (laboratory)	PEK_U03	Evaluate of reports La2 – La7, La9 – La13 and calculation of average grade

C(laboratorium) = (F1+F2+F3)/3
